

Premium UC

Premium-UC VoIP solutions for enterprises and small to medium businesses are scalable, secure and, most importantly, save businesses money! By switching or augmenting your current communication system to include VoIP, organizations can realize immediate benefits like increased productivity, greater communication flexibility and cost savings. Whether you are looking for an out of the box product or a fully customized solution, CounterPath has the expertise and know-how to get your business on the right track.

Premium-UC Enables Businesses to:

Offer employees and customers a more collaborative, efficient, and secure way to communicate anytime, anywhere, on any device, on any network.

Deploy cross-platform, Bring Your Own Device (BYOD) strategies that work on over 90% of mobile devices.

Allow IT managers to securely access, provision and manage Unified Communications (UC) clients from one convenient interface and adopt Enterprise Mobility Management (EMM) frameworks.

Lower costs by integrating upgradable UC clients instead of desk phones, reducing reimbursements to employees for mobile charges, and avoiding expensive international mobile calls.
